PROFILI STRUTTURALI IN PVC ESPANSO AD ALTA DENSITÀ PVC HIGH DENSITY EXPANDED STRUCTURAL PROFILES

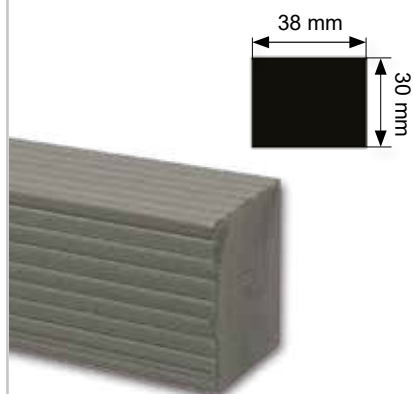

Ideali sia per le riparazioni sia per la creazione ex novo di pareti o pavimentazioni, costituiscono un'eccezionale alternativa alle travi in legno, in quanto il materiale composito di cui sono composti li rende perfettamente impermeabili, resistenti ad infiltrazioni ed umidità.

Sagomabili a seconda delle proprie necessità. Finitura della superficie rigata, per favorire una migliore adesione del collante è possibile irruvidire la superficie spazzolandola. Vendute in travi da 2,5 m.

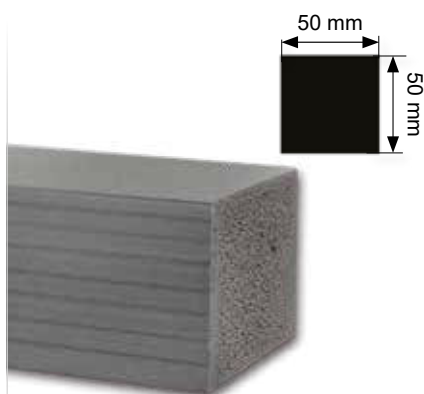

Ideal both for repairs and for the creation of new walls or floors, they are an exceptional alternative to wooden beams, as the composite material they are made of makes them perfectly waterproof and resistant to infiltration and moisture. They can be shaped to suit your needs. Roughened surface finish; to promote better adhesion of the adhesive, the surface can be roughened by brushing. Sold in 2.5 m beams.
